Gabi is our main villager we will be talking about today.

Welcome

This magazine is called "Just be Happy" because my Animal Crossing island is called Happy. Right now my island has a two star rating. I hope to make this island better by making an incline, making another bridge and even getting my dream villagers. I already have all the basics like Nooks Cranny, Able Sisters and the museum. I started off with a tent to live in, the Resident Services tent and two starting villagers. That's ok for now. In this magazine I will give tips to make your island better, items that sell for a lot of money and much more. I hope you love reading this as much as I enjoyed writing it. With this much space left on the page I will show you my two starting villagers.

Flip is on the right and Tammy is on the left.

Latest Happy news

The latest news on Happy is not much but we do have a few new announcements like Astrid who invited herself to his island. When Astrid asked to move out of Dominick's island she moved out. You wonder how this relates to Happy? Well, I stupidly left a house plot out all night and I also moved out a villager I had named Eugene, who I did not like. My mom gave me Gabi's amiibo card and the first day she was at my campsite I asked her to come but she said "no" because my island was full. The second day she said "no" again. The third day she said she could if someone could leave so she should come so she asked me and I said Eugene could leave the same day. He started packing up and left the next day. Festival is coming soon and I already picked out the perfect outfit. I also reserved a spot for a natural ramp. That is all of the latest Happy news.
